MUSIC SUPPORT TECHNICIAN

U.S. ARMY

Music Support Technicians in Army Bands provide technical support for pop, rock, country, jazz, and concert ensembles. Responsibilities include, but are not limited to, audio mixing, rigging, power distribution, audio-over-IP systems, and lighting.

Audition Requirements

Part 1: Prepared Mixes

This is your opportunity to demonstrate your mixing skills. Using a large-format live sound console, applicants will have one day to mix two provided songs, each containing 16–24 tracks. Once completed, applicants will preform both mixes for the adjudicator for evaluation.

Part 2: Quickly Prepared Mix

This portion of the audition evaluates how quickly and efficiently applicants can develop and manage a mix with limited preparation. Without prior exposure to the material, applicants will have 10 minutes to mix a 16-track song.
